

1 ABSTRACT OF THE DISCLOSURE

2 A method for making a ball includes the steps of preparing a mold composed of
3 a lower mold and an upper mold detachably connected to the lower mold, wherein the
4 lower mold and the upper mold have multiple suction holes, filling the lower mold and
5 the upper mold with covering pieces, filling the lower mold and the upper mold with
6 strips, placing a bladder in the lower mold and on top of the covering pieces and strips in
7 the lower mold, mating the upper mold with the lower mold, securing the covering
8 pieces on the bladder, and removing finished product from the mold.
